# ROBUST, LOW- MAINTENANCE, ELEGANT.

TECEsolid family:  
Toilet and urinal flush plates for  
public and semi-public areas

**NEW**

## SOLID AND CHIC

TECEsolid and TECEfilo-Solid are new flush plates for toilet and urinal with extremely robust design. Their flat construction is characterised by the harmoniously rounded edges and high-quality stainless steel finish. The attractive price makes these plates especially interesting for use in project business. But thanks to their optical qualities they also work wonderfully in private high-quality bathrooms.

“The fittings used in public sanitary facilities need to be able to withstand a lot. The aesthetics shouldn't suffer, though.”

### TECEsolid and TECEfilo-Solid for toilet and urinal

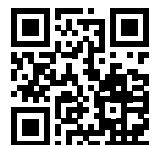

- Robust and durable – thanks to the 2 mm-thick stainless steel surface
- Very flat – just 6 mm from the wall
- Manual flush plates and hygienic, touchless electronics
- In various surfaces, optionally available with anti-fingerprint coating
- Anti-theft protection – screws on covertly

NEW

As a driver of innovations for the toilet, TECE is adding touchless toilet electronics to its product range: TECEsolid is a robust and water-saving flush for public areas and has a self-explanatory dual-volume flush system. The touchless actuation support the hygienic requirements in public toilets. An innovative sensor taken from camera technology is used here for the first time. It detects precisely the touchless actuation of the dual-volume flush system and distinguishes from other movements of the user to reduce unintended flushing. The new TECEsolid has an integrated hygiene/interval flush program and can be programmed via an app.

You can find more information here:

# New flush concept for public toilets

Puristic design, robust installation, attractive price – attributes that make the flush plate series TECESolid particularly interesting for use in public and semi-public areas. The plates have a resistant, two millimetre-thick stainless steel surface and can be screwed concealed for reliable protection against theft. However, the optionally electronic or manual flush plates cut a good figure on toilets and urinals mainly because of their clean look – and do so in a wide range of furnishing categories: from the simple or upmarket property to the sophisticated private bathroom.

- 1 TECESolid toilet flush plate with dual-flush technology in brushed stainless steel
- 2 TECESolid urinal flush plate in bright white

1

## TECEfilo-Solid electronic urinal flush plates with infrared sensor:

The flush time, flush volume, pre-flush and hygiene flush and the water-saving break function (lower flush volume during busy periods) can all be programmed. The product comes with a programming key.

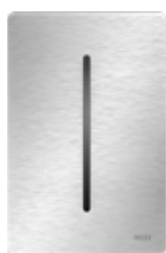

### Hygiene flush:

Automatically timed flush: 24, 72 or 168 hours after the last use.

### Pause function/stadium function:

The flush volume is automatically reduced if the urinal is flushed at frequent intervals of less than two minutes.
